### Project Name – Sentiment Analysis

**Technology Used:** PySpark,Kafka,Zookeeper,Airflow,Docker Compose,PowerBI

**Descriptions:** Built sentiment analysis tool with Reddit API, PySpark, and Power BI. Streamed data via Kafka and Zookeeper. Containerized app with Docker Compose. Data lake for analytics

## SKILLS

Python Programming  
BigData  
PySpark  
Machine Learning  
Deep Learning  
Python  
Libraries(Numpy,  
Pandas, Scipy, Seaborn,  
Scikit learn)  
SQL  
Django Framework  
Django ORM  
Java  
Kotlin  
Android Development  
HTML  
CSS  
Tableau

## AWARDS

General Knowledge  
Award -2017 (First at  
School)

## **Project Name — News App**

**Technology Used :** kotlin, xml, Android Studio, Retrofit, NewsApi

**Descriptions :** In this project I divide the news in several categories and according to that user can see the news and with the help of a room database user can store his news in a save fragment.
